✓ Description

Story 1.1: Route Compatibility Matching
As a Rider Commuter, I want the system to match me with Driver Hosts whose routes overlap with mine within a 1.5 km detour tolerance, So that I only see rides that are genuinely convenient for both of us.

Description

Story 2.1: Automatic Fare Split Calculation
As a Rider Commuter, I want the system to automatically calculate my share of the fuel cost based on distance and number of co-riders, So that I know exactly what I owe before paying.

Description

Story 2.2: Driver Document Verification
As a Driver Host, I want to submit my driving license and vehicle registration for verification before publishing a ride, So that riders can trust I'm a legitimate, safe driver.

Description

Story 3.1: Secure Data Storage
As a Driver Host, I want my license, ratings, and travel history to be stored with encrypted backups, So that my personal data stays protected from breaches or loss.

Description

Story 3.2: Fast, Reliable Matching Under Peak Load
As a Rider Commuter, I want route matches to load quickly and reliably even during rush hour with thousands of concurrent users, So that I'm not stuck waiting when I need a ride most.
